

Better Than An EasyBake Oven!

Description

Desktop Factory Printer Prototype [Desktop Factory Printer](#)

About 90 lbs, and it can create 3D objects up to 5"x5"x5", with the specs fed in from your CAD/CAM program. Just advanced bubblejet like printing technology. Layers are .01" per pass.

Got about \$5000 you don't need more than small parts for your car, your home, or stuff just for fun?
