

Lex wants a Mazda, I'll Take One of These

Description

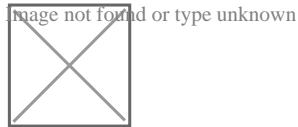

[Capt Lex](#) says he wants a [Mazda Kabura](#), but I really think he let out that his eyesight is slipping from the one eagle eyed 20/15 measure he is used to....that's way too sad for any pilot.

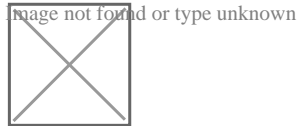

But, in the spirit of tech lustâ,,ç, I'd like one of these:

[A really, really BIG Screen.](#)

Now, on the other hand....

these would be nice (and would keep from disturbing others in the room), but...alas, as with many things developed for the DoD, it's really kinda pricy..(I think about \$26K) and it looks very nerdish.

These are more compatible with the middle income pocket book, in the \$899 retail range...
